

PA Rare Bird Report

Submission Date	2019-05-18 14:31:43
Observer's Name	Bobby Brown
E-mail	bobbybrown1011@gmail.com
Observer's Address	United States
Names of additional observers	Many observers. Found by Paul Dennehy and his wife
Species (Common Name)	Black-bellied Whistling-Duck
Species (Scientific Name)	<i>Dendrocygna autumnalis</i>
Number of individuals	37
Observation Date and Time	05-18-2019 8:50 AM
Did you submit this sighting to eBird?	Yes
Link to eBird checklist	https://ebird.org/view/checklist/S56444248
County	Montour
Location (City, Borough, Township)	Turbotville
Exact Site (E.g. Name of park, lake, road)	Rt 54 Wetlands
GPS coordinates of sighting	41.091045,-76.705359
Description	Pretty straightforward ID -- see photos.
Behavior (be as detailed as possible about what the bird was doing)	Mostly just sitting in the wetlands. They briefly took flight, did a lap around the wetlands and landed in the same spot they had been.
Discussion – anything else relevant to the observation that will aid the committee in evaluating it:	I suspect others may submit reports. I'm mostly submitting this to include documentation of the count, since I'm not sure if others obtained photographic evidence of that, and it might be the state high count. If further details are needed, let me know.
Supporting evidence (check all that apply)	Photograph
Upload images, audio, video or drawings
