Documentation for a Ross's Goose (Chen Rosii) in Allegheny County

Observers: Scott Kinzey and Kerri Evans

Date: November 14, 2000, late afternoon

Location: North Park in between the Mars and Latrobe Picnic areas, first on lawn, then
on water

We drove to North Park to try and find the Ross's Goose that had been reported. As we were driving by the Mars picnic area Kerri yelled out, "There it is!." We parked the car and I stepped out to photograph the much smaller white goose that was feeding with Canada Geese. It had black primaries showing on the folded wing. I was not feeling well and left after shooting about 2 rolls. One slide is enclosed.
