**Submission Date** 2012-11-05 20:02:20 **Observer's Name** Todd Fellenbaum E-mail t fellenbaum@hotmail.com Phone 302-259-8068 Observer's Address Street Address: 233 Gaskill St City: Philadelphia State / Province: PA Postal / Zip Code: 19147 Country: United States Names of additional Adrian Binns, Debbie Beer, Al Guarente, Frank observers Windfelder, and many others. **Species (Common Name)** Red Phalarope **Species (Scientific Name)** Phalaropus lobatus Number of individuals 1 Have you submitted this to Yes eBird? Age(s) and Plumage(s) and Nonbreeding Adult Sex (if known) **Observation Date and Time** 10-31-2012 7:10 AM County Philadelphia Location (City, Borough, Philadelphia Township) Exact Site (E.g. Name of park, John Heinz NWR lake, road) **Habitat** Lake-impoundment after Hurricane Sandy Distance to bird 35 yards Viewing conditions Fair Optical equipment used Scope and Binos **Description** Medium-sized shorebird; forehead, face, and breast white; black patch through eye; pale gray back and nape; longish bill. Behavior (be as detailed as Noticed bird from quite a distance away because of size and active feeding behavior. It was swimming and possible about what the bird

was doing)

darted around picking at the surface of the water.

Watched for about fifteen minutes.

Separation from similar species (How you eliminated others)

Red-necked Phalarope is the only other possibility. This bird had a paler gray back than the darker, streaked back seen on Red-necked Phalaropes. The thicker bill was also evident.

Discussion – anything else relevant to the observation that will aid the committee in evaluating it:

Debbie Beer was able to get a photograph of the Red Phalarope.

Are you positive of your identification? (Why or why not)

Yes--not a difficult ID.

**During** 

Sibley
