Description	<p>Since this report is much after the fact, following are the notes I entered into eBird on the day of the sighting:</p> <p>Continuing first cycle. Distinctive plumage pattern in flight: on upperside, black outer primaries throughout feathers, secondaries and inner primaries as a white triangle on trailing edge of wing, mantle scalloped brown/gray, with same color extending onto nape, sides of neck, and some of the crown. Small black bill, short white tail with black tips.</p>

Behavior (be as detailed as possible about what the bird was doing)

Bird was mostly foraging over the lake within sight of the Clarion-side boat ramp. Occasionally it would rest on the water.
