**Rufous Hummingbird**

Nov. 3, 2003

Location:

Clare and Joe Terrill  
9691 Donation Rd.  
Waterford, Pa. 16441  
Erie Co.

Band # N22752

Species: RUHU

Age/sex: AHY-F

Wing: 44.5

Tail: 26

Culmen: 17.95

Percentage of bill grooving: 15

Gorget feathers: 15, centrally located

Weight: 3.29 g

Fat: 1

R5 width: Not critically measured (host did want me to pull a rect, was worried it would harm the bird) but was at least 3.91 mm wide based on in-hand measurement, putting it well above Allen's threshold.

No apparent notching in R2, as is typical of many AHY-F rufous and Allen's. Distinguished by wing measurement, which is above 43.3 mm maximum for Allen's, and by R5, which is far above 2.8 mm maximum for Allen's.
