Names of additional observers	Rich Hanlon
Species (Common Name)	Varied Thrush
Species (Scientific Name)	<i>Ixoreus naevius</i>
Number of individuals	1
Observation Date and Time	12-08-2019 3:20 PM
Did you submit this sighting to eBird?	Yes
Link to eBird checklist	https://ebird.org/checklist/S62159062
County	Tioga
Location (City, Borough, Township)	Wellsboro
Exact Site (E.g. Name of park, lake, road)	Hills Creek Estates
GPS coordinates of sighting	Approx 41.815, -77.210
Habitat	Yard surrounded by forest
Description	Size and shape like a small robin with a long thin bill. Distinctive plumage: gray back and band across chest, dark face, crown, and wings, with bright orange throat, breast, wing bars, patches on flight feathers, and supercilium starting from above eye. Mottled flanks, white belly, and white with dark marking on undertail.
Behavior (be as detailed as possible about what the bird was doing)	Ate from the platform feeder, and flew between various perches on edge of trees.
Supporting evidence (check all that apply)	Photograph
Upload images, audio, video or drawings
