

824-01-1980 1/15(2)

Dear Barb -

Here are the slides of the Fork
Sunting. It was seen on May 25, 1980.
The bird is small in the slides - you
definitely need to put it upon a screen
to see it, but it is quite identifiable, ^{I think}
It was seen by Mike & me & another
binder. If you need written details,
please let us know. The slides are from
our yard & our neighbor's yard.

Two of the slides are better than the others,
but I'm sending you all of them. We were
more interested in seeing the bird than "verifying"
it at the time, so we didn't try for closer shots.

I think it is clear from the slides that it
is not a Bobolink. We also heard it
sing.

If the slides are suitable for your purposes,
please let us know if you need anything else.
We won't be offended if you think the slides
don't show enough, (but please use a projector.)
Let us know what you decide.

Bad news - my brother Bob passed away on
Jan. 4. He needed a heart transplant & no hearts were
available. He was only 52 (younger than Bill.) I still can't
believe it. ^{The cause}
