

~~\_\_\_\_\_~~ I wrote down a few more details I observed this bird  
2 May 1987 on S.G.L. 46 near Hopeland. The area was off Seglock Rd. near the Horseshoe  
trail. I was turkey hunting at the time so I was in full camo. I was hunting the  
large clear cut area on top. Not long after light the small birds were active, mostly  
white-throated sparrows. Then 15 ft away a Harris' Sparrow came into view. It was on a brush pile.  
The bird was very similar to the one I observed in Franklin Co. The black on the face  
extending down to the breast with the flesh colored bill was the most outstanding field mark.  
This bird was ~~larger than~~ the other birds. I watched it for a few minutes then it flew a  
short distance away ~~\_\_\_\_\_~~

Mike Gockley ~~from~~ the bird club has said he saw a Harris' Sparrow in Lancaster Co.  
Possibly Middlecreek. You might want to talk to him about that.

Hopefully this will help you update the list. If you need any other info just call  
or write.
