"Horary Redpoll"

I observed 1 at my feeder March 19, 1994
about 10 feet away. With my 8x40 binoculars
from inside my house. In bright sunlight at
8:45 AM. - I well noted the lightness of the
back and ~~sup~~ rump area - tanish back & unstreaked
rump lightish pink in color as opposed to
the striped & dark brownish color of that area on
the Common Redpoll - 2 were at the same feeder as
the Horary for good comparison. Conical bill
shape, slightly larger, with no dark streaks on
the undertail coverts were also noted.
