Description	The weight of the bird was only 240g, and it had a very sharp

	<p>keel. This bird was in bad shape, but still alive when Mike saw it and took measurements. The wing chord was 266mm and up tail was 140mm, exposed culmen 28.5 mm. The examination was brief as Mike did not want to unduly stress out the bird, however the bird was in rough shape. It was taking fluids, but not responding well.</p>
<p>Behavior (be as detailed as possible about what the bird was doing)</p>	<p>This bird was found under a mailbox in Hollidaysburg, PA (Blair County) and not near water. It has since died and should be heading to a museum collection.</p>
