Crawford
2/194

Lawrence's Warbler.

APRIL 30 - 1994 - State Game Land Rd. off 285
west of Rt. 19 1 mile. 3 miles east of Geneva - PA

Sunny and breezy.

Bird was 4 or 5 off ground in low shrubs.
Song attracted us to it. Golden-winged warbler-
like, which we assumed it would be, but
spotted large warbler with almost solid
yellow body from breast to lower belly. Wings
darker with prominent white wing bars. The
black patch on face below eye made us look
harder and the large, black throat patch was
visible above yellow breast clinching the
identification to the hybrid Lawrence's.

First personal sighting ~~(of it)~~
for both of us.
