If a Specimen, where is it stored? _____

Description: (Attach additional pages as needed —Please do not write on back of this form)

This hummingbird was visiting a sugar-water feeder at the residence of ~~the~~ JOAN KRAMER at Lake Wynonah [name of the development]

Bird to me, gave slightly different looks, depending on sun, etc. Appeared to have light tan color on the breast... which was some below the chin. Bird did have brownish spots on the mostly green upper back.

It made daily visits to the Kramers' feeder. Toward the end of its stay, the Kramers were switching between 2 feeders due to freezing. They'd take ^{new} one out if the current one outside was getting frozen.
