Rufous / Allen's Hummingbird - went to see the
hummer at 402 Manor Drive. The bird appeared shortly
and viewed from about 50 yds w/ 30x scope

Description - Selousian type hummer.

Upperparts - head & back mostly a copper green color
Tail rufous. Underparts - Throat with multiple
dark vertical stripes. ~~Throat~~ upper breast white with a
faint rufous band across the upper mid breast. The
belly was white.

I think the bird is probably a Hy-M Rufous.
