Description	See attached link - http://www.pbase.com/rbrady/paberkschoary
Behavior (be as detailed as possible about what the bird was doing)	Feeding at my thistle sock.
Separation from similar species (How you eliminated others)	Common Redpoll was feeding at the same time on the same sock.

Smaller bill. Less streaking.

Discussion – anything else relevant to the observation that will aid the committee in evaluating it:

I first saw the bird on April 6th. The camera clock is off by a day. I also wanted my son to see the photos before I made the call that it was indeed a Hoary Redpoll. The bird was again seen and photographed at my feeder today but not after 9:30 a.m.

Are you positive of your identification ? (Why or why not)

Yes. I had Rudy Keller and Kerry Grim at my house and had them confirm the id from the photos.
